Subject: Concerning Rosemont Copper

Greetings:

I wish to address the application from Rosemont Copper. Rosemont has willingly done their part to fit the criteria set by each agency in order to keep the natural state of our environment intact.

There is absolutely no reason not to approve their plans.

Rosemont has bent over backwards to fulfill all of the requirements given to them.

Through the lengthy process, it has been proven by the US Fish and Wildlife Service that none of the ten federally listed species, both threatened and endangered, that inhabit the project area will be harmed in any way.

We cannot listen to opponents when they continue to fabricate any reason to delay the process of Rosemont.

Arizona will benefit a greatly from this mining business. We are in dire need of finding more jobs. Please continue to carry out the process deliberately, while approving Rosemont Copper in a timely manner.

I do appreciate the fact that you also care about Arizona and have

done what you believe has been the right thing.

I just believe that everything has been done and it is time to move on3.

Respectfully,

Marlys Cashmer

Tucson, AZ
